1. Park your vehicle out of direct sunlight in a cool, shaded area.
2. Prepare one bucket (with dirt separator grid at the bottom) with car wash solution and water, according to manufacturer's recommendations.
3. Prepare a second bucket with clean water, for use in rinsing the wash mitt. Always rinse the mitt first, placing only a clean mitt into the wash solution.

Drying For best appearance, dry your vehicle with a clean damp chamois or microfiber towel. Do not allow finish surface to air dry, as air drying will allow water spots to form. If finish surface starts to air dry, continue dampening these areas until you are able to hand dry.
