		When all of the following judgments are made within a certain period of time <ul style="list-style-type: none"> <li>• When the driver is looking aside in the direction of left-right tilt</li> <li>• When the driver does not move at all while facing other than the front</li> <li>• When the driver is facing the front and does not move at all</li> <li>• When the driver is looking aside up and down</li> <li>• When the driver is looking aside in the left-right direction</li> <li>• When the driver is looking aside in the left-right direction before frontal learning</li> </ul>	NG63
Visual angle (Yaw)	Power switch ON	When the driver's line of sight is pointing to the right	Positive value
		When the driver's line of sight is pointing to the left	Negative value
Visual angle (Pitch)	Power switch ON	When the driver's line of sight is pointing up	Positive value
		When the driver's line of sight is pointing down	Negative value
Face location Z	Power switch ON		Displays Z-axis value of face position
Face location Y	Power switch ON		Displays Y-axis value of face position
Face location X	Power switch ON		Displays X-axis value of face position
Start-up status	Power switch ON	When the driver monitor camera control unit is performing startup processing	Running
		When the driver monitor camera control unit is operating normally	OK
		When the driver monitor camera control unit is not operating normally	NG
Left eye location X	Power switch ON		Displays X-axis value of left eye position
Left eye location Y	Power switch ON		Displays Y-axis value of left eye position
Left eye location Z	Power switch ON		Displays Z-axis value of left eye position
Right eye location X	Power switch ON		Displays X-axis value of right eye position
Right eye location Y	Power switch ON		Displays Y-axis value of right eye position

Monitor item	Condition		Value/Status
Right eye location Z	Power switch ON		Displays Z-axis value of right eye position
Outer corner of left eye	Power switch ON	When the outer corner of the left eye is not detected	Not detected
		When the outer corner of the left eye is detected	Detected
Inner corner of left eye	Power switch ON	When the inner corner of the left eye is not detected	Not detected
		When the inner corner of the left eye is detected	Detected
Outer corner of right eye	Power switch ON	When the outer corner of the right eye is not detected	Not detected
		When the outer corner of the right eye is detected	Detected
Inner corner of right eye	Power switch ON	When the inner corner of the right eye is not detected	Not detected
		When the inner corner of the right eye is detected	Detected
Left nostril	Power switch ON	When the left nostril is not detected	Not detected
		When the left nostril is detected	Detected
Right nostril	Power switch ON	When the right nostril is not detected	Not detected
		When the right nostril is detected	Detected
Left end of mouth	Power switch ON	When the left end of mouth is not detected	Not detected
		When the left end of mouth is detected	Detected
Right end of mouth	Power switch ON	When the right end of mouth is not detected	Not detected
		When the right end of mouth is detected	Detected
Left ear	Power switch ON	When the left ear is not detected	Not detected
		When the left ear is detected	Detected
Right ear	Power switch ON	When the right ear is not detected	Not detected
		When the right ear is detected	Detected
Nose tip	Power switch ON	When the nose tip is not detected	Not detected
		When the nose tip is detected	Detected
Glasses	Power switch ON	When the glasses are not detected	Not detected
		When the glasses are detected	Detected
Face	Power switch ON	When the face is not detected	Not detected
		When the face is detected and the face is within the proper range	In range
		When a face is detected but the face is out of the proper range	Out of range
